PROFESSIONAL SUMMARY

Computer Engineering undergraduate with strong knowledge of Java Full Stack Development, including Core Java, Object-Oriented Programming (OOP), Collections Framework, SQL, JDBC, Servlets, JSP, and MySQL. Experienced in developing full-stack and database-driven applications with hands-on exposure to Apache Tomcat, Maven, Git, GitHub, and Eclipse. Passionate about software development, problem-solving, and building scalable applications.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Web Technologies: HTML5, CSS3, Servlets, JSP

Database: MySQL, JDBC, Database Normalization (3NF), Joins, Subqueries

Core Computer Science: Object-Oriented Programming (OOP), Data Structures, Collections Framework, Exception Handling, CRUD Operations, Problem Solving

Tools & Platforms: Eclipse IDE, VS Code, Maven, Apache Tomcat, Git, GitHub, SQL*Plus, Android Studio, Sublime Text

EDUCATION

Bachelor of Technology in Computer Engineering 2022 – 2027

Bharati Vidyapeeth (Deemed to be University)

Higher Secondary Certificate (HSC) 2022

Shiv Chhatrapati College — 73.20%

Secondary School Certificate (SSC) 2020

St. Xavier's School — 83.20%

PROJECTS

SmartPay Banking Application

Technologies: Java, MySQL, XML, JDBC, Servlets, JSP, Maven, Apache Tomcat

- Developed a secure banking application with authentication and session management.
- Implemented fund transfer functionality and transaction processing.
- Designed normalized database schema for data integrity.
- Optimized database queries for improved performance.

Online Food Ordering Platform

Technologies: Java, MySQL, HTML5, CSS3, Servlets, JSP, JDBC

- Developed a full-stack food ordering system.
- Implemented cart management and order tracking.
- Added secure login and session management.
- Applied server-side validation for secure data processing.

Farmer Management System

Technologies: Java, MySQL, JDBC

- Managed farmer profiles, crop records, and sales data.
- Implemented backend validation and optimized SQL queries.
- Maintained data integrity using database normalization techniques.

CERTIFICATIONS

- Java Programming Masterclass: Beginner to Master
- Python 101 for Data Science
- Cybersecurity Analyst Job Simulation

ACHIEVEMENTS

- Developed multiple full-stack academic projects using Java technologies.
- Hands-on experience with database design, normalization, and backend development.
- Strong understanding of software engineering principles and application development.
